

Consider the following checklist of questions before you hire a contractor:

- * How long has the contractor been providing the service?
 - * What do others who have used the contractor say about his or her work performance?
 - * Is the contractor licensed and bonded with insurance to protect your interests and liability? **THIS IS A REQUIREMENT FOR REIMBURSEMENT**
 - * Will the contractor visit your property and discuss your specific goals, objectives and constraints? Most will do so without charge.
 - * During a declared fire season, will the contractor observe all necessary prevention, training and fire suppression requirements?
 - * How does the contractor's stated bid or estimate compare with the bids of others who can provide the same services?
 - * Does a written agreement exist that specifies exactly the conditions, location and payment terms for the work to be performed?
- *We recommend hiring contractors only after carefully examining their credentials and experience.**
