

"Opportunity Partners Success"
October 16, 2009

Culinary Arts

The Culinary Arts Program had another successful Food Cart sale at the Lane County Farmer's Market, where we sold Tandoori Chicken, Lentils, and Rice!! We composted approx. 60 gallons of compost, to be used in our farm, and lastly we're looking forward to completing our THIRTEEN caterings next week!

Technology Program

All Computer Tech students successfully tested and re-assembled their computers last week. What a thrill to punch that button and see the computer come to life. Nothing like a little success to breed more success! Now we will install the operating system, applications, and system drivers to complete the process of completely refurbishing the computer.

Horticulture Program

Crews finished trail work on the Tire Mountain Trail this week, completing a 30 mile section! Crews also downed timber from Bryce Canyon Campground. Our team, demolished and removed a desolate forest service building, and (last but not least) continued work on local Off Highway Vehicle Trail Systems. We've been busy!

Construction and Utility Career Day

Ten youth from our Education Center enjoyed participating in a hands-on Construction and Utility Career Day.

Students operated back hoes, bull dozers, mechanical lifts, and other heavy equipment. They practiced wiring a light bulb, bending pipes, drilling into concrete, using a rivet gun, putting mortar on bricks, and racing each other to hammer nails and maneuver wheel barrows. They received information about how to enter the construction trades, apprenticeship programs, and opportunities at LCC, Job Corps, and with local businesses.

Students took full advantage and had a great time!
