“Opportunity Partners Success”

August 28, 2009

Horticulture Program

The crew worked hard this week. Crews completed 10 miles of trail work, for the United States Forest Service! Our City Crew worked on the local Ridgeline Trail System, completing 1.5 miles of trail brushing, and worked on removal of exotic invasive plant removal, at local city parks. Our on-site HORT Crew, picked 50 lbs of veggies out of the DYS garden....come by and say hello.
THE VEGGIES ARE FANTASTIC!!

Technology Program

Four computer tech students are busy working at Next Step Recycling, this summer, taking advantage of the opportunity to make some money and gain valuable work experience. Two students are working on sorting and disassembling donated electronic components and will soon advance to other areas. Two others have already moved up to the “Build Area,” where computers are refurbished for re-sale to the public. A good way to spend the summer, honest employment that also benefits our community.

Nice work!

Culinary Arts Program

It's been a busy and exciting week for the Culinary Arts program. Several students attended a hands-on training with, Marvy Shuman of the Phillipine-American Association and prepared a Filipino dinner for that staff and youth in Detention and the Phoenix Program. Youth did all the work from chopping vegetables, to mixing the marinade, rolling lumpia (egg roll) and turon (fried bananas), cooking the pansit (noodle and vegetable dish), rice, adobo (marinated chicken), and frying the lumpia and turon. Students showed excellent focus and teamwork.
