(ii) Along all lakes, and fish-bearing streams with average annual stream flow less than 1,000 cfs, as designated for riparian vegetation protection by the Eugene-Springfield Metropolitan Area General Plan, the riparian corridor boundary shall be 50 feet from the top of bank.

(iii) In areas where the top of each bank is not clearly defined, or where the predominant terrain consists of steep cliffs, the provisions of OAR 660-023-0030 shall apply, rather than the provisions of this section.

(b) **Removal of Vegetation Within the Riparian Setback Area.** The standards of Lane Code 16.253(2) above, shall apply to the maintenance, removal, destruction and replacement of indigenous vegetation within the riparian setback area along Class I streams designated for riparian vegetation protection by the Eugene-Springfield Metropolitan Area General Plan for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries.

The permanent alteration of the riparian area by grading or by the placement of structures or impervious surfaces is prohibited, except for the following uses, provided they are designed and constructed to minimize intrusion into the riparian area:

(i) Streets, roads, and paths;
(ii) Drainage facilities, utilities, and irrigation pumps;
(iii) Water-related and water-dependent uses; and
(iv) Replacement of existing structures with structures in the same location that do not disturb additional riparian surface area.

(c) **Compliance.** Removal of vegetation from within the riparian setback area in excess of the removal provisions in LC 16.253(6)(b) above, without prior Planning Director approval, shall require compliance with the provisions of LC 16.253(4) and LC 16.253(5)(c) above, and may be subject to other remedies available to Lane County for violation of the standards in LC 16.253(6) above.

(d) **Exceptions.** The following uses and activities are excepted from the riparian setback area removal standards of LC 16.253(6)(b) above.

(i) Commercial forest practices regulated by the Oregon Forest Practices Act.

(ii) Removal of dead or diseased vegetation that poses a safety or health hazard, excluding removal of root wads.

(iii) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(iv) Normal and accepted farming practices other than buildings or structures occurring on land zoned for exclusive farm use.

(v) Riparian enhancement projects replanted with indigenous vegetation approved by the Soil and Water Conservation District (SWCD) after consultation with the Oregon Department of Fish and Wildlife.

(vi) Removal of non-native vegetation and replacement with native plant species;

(vii) Removal of vegetation necessary for the development of water-related or water-dependent uses.

(ix) Permanent alteration of the riparian area by the placement of structures or impervious surfaces upon a demonstration that equal or better

protection for identified resources will be ensured thorough restoration of riparian areas, enhanced buffer treatment, or similar measures. In no case shall such alterations occupy more than 50 percent of the width of the riparian area measured from the upland edge of the corridor.

(e) **Modifications.** A modification to the applicable riparian setback standard in LC 16.253(6)(a) for a structure may be allowed provided the ODFW is consulted by the Planning Director at least 10 working days prior to the initial permit decision and an application for a modification to the setback standard has been submitted pursuant to LC 14.050 and approved by the Planning Director pursuant to the requirements of LC 14.100 with findings of compliance addressing the following criteria:

(i) It can be demonstrated that the property was incorrectly identified as meeting the criteria of LC 16.253(6)(a)(i)&(ii), above.

(ii) It can be demonstrated that the lot or parcel has been rendered not developable for the primary use allowed in the base zone, by application of the riparian setback standards of LC 16.253(6)(a) to a lot or parcel that was lawfully created prior to the adoption of LC 16.253(6)(a). Approval of development under this provision must meet the following standards:

(aa) Due to topography, parcel size or configuration, or significant resource limitations, all options for development outside of the setback area are physically impracticable.

(bb) All development shall be located to the greatest degree practicable outside of the riparian setback area. The request shall be the minimum necessary to render the property developable.

(cc) The modification is not the result of a self-created hardship. After the date of adoption of LC 16.253(6), the reconfiguration of a lot or parcel as a result of a lot or property line adjustment, in whole or part within the riparian setback area, shall be determined to be a self-created hardship by the creator and subsequent property owners.

(dd) Mitigation measures shall be taken to minimize to the greatest degree practicable any impact to habitat units or habitat values of the setback area by development actions in the setback area.

(ee) Permanent alteration of the riparian area by placement of structures or impervious surfaces within the riparian corridor boundary may be authorized upon demonstration that equal or better protection for identified resources will be ensured through restoration of riparian areas, enhanced buffer treatment, or similar measures. In no case shall such alterations occupy more than 50 percent of the width of the riparian area measured from the upland edge of the corridor.

(a) The placement, alteration, and maintenance of not more than one permanent single-family dwelling or manufactured dwelling on a lot or parcel of any size.
