RESTRICTION ON USE OF SOLID FUEL SPACE HEATING DEVICES

9.120 Purpose and Findings.
(1) The health, safety and welfare of the citizens of Lane County are adversely affected by the degradation of air quality. Violations of federal ambient air quality standards, as measured by the Lane Regional Air Protection Agency (LRAPA), occur periodically in Lane County.
(2) Wood and other solid fuel combustion for space heating produces particulate matter and other emissions which are physically harmful and aesthetically unpleasant, and which contribute to the degradation of air quality and the violation of federal ambient air quality standards.
(3) Periodic restriction of the use of solid fuel space heating devices will improve air quality. LRAPA has the expertise to determine when such air quality is at such a level that such restriction is necessary to preserve the health, safety and welfare of the citizens of Lane County.
(4) It is the intent of Lane County that the penalty section of this ordinance not take effect until November 1, 1991. (Revised by Ordinance No. 9-90, Effective 1-18-91; 1-10, 6-11-10)

**TREE CONSERVATION AND PROTECTION**

**9.900 Description and Purpose.**

It has been found necessary to adopt an ordinance regulating the cutting of trees in the area between the Eugene city limits and the Urban Growth Boundary. Provisions in this ordinance shall apply until such time as the area is annexed into the City of Eugene. *(Revised by Ordinance No. 14-90D, Effective 11.21.90 [Sunset 11.30.91]; 16A-91, 11.20.91 [Sunset 6.1.93]; 4-93, 5.19.93 [Sunset 12.1.94]; 11-94, 11.22.94 [Sunset 12.1.95]; 3-96, 11.1.96)*

**9.905 Definitions.**

As used in LC 9.910 through LC 9.940 below, the following definitions apply:

- **Basal Area.** The cross-sectional area of a tree, measured at diameter breast height, and expressed in square feet per acre.
- **City Manager.** The City Manager of the City of Eugene.
- **Caliper.** The trunk diameter of young trees, usually measured at 6 inches above ground level.
- **Critical Root Zone.** A circular area surrounding a tree, of which the center is the center of the tree trunk and the radius is the distance from the outside of the trunk to any point 12 times the diameter at breast height (DBH), which points constitute the circumference of the critical root zone. The critical root zone shall extend to a depth of five (5) feet below surface ground level.
- **Crown Closure or Canopy.** An estimated area or space made up of the living limbs and branches of an individual tree. Crown closure is usually expressed as a percentage of the space occupied by the crown or canopy of a tree or trees and is usually stated in terms of crown or canopy density.
Crown Ratio. The estimated ratio of live limbs of a tree to its total height.

Developed Property. A lot or parcel of land upon which a building or other improvements subject to local construction regulations are located or a primary use is established.

Diameter Breast Height (DBH). The cross-sectional diameter of the trunk of a tree when measured at a point 4-1/2 feet above the base of the trunk on the uphill side.

Forester. A professional person having a minimum of a four-year degree in forestry from an accredited school and having experience in forest land management.

Groundcover. Small herbaceous and woody plants such as low-growing shrubs, ferns, mosses, wild flowers, grasses or other types of vegetation which normally cover the ground, provide root stabilization on slopes, slow surface runoff and absorb precipitation.

Land Clearance. The act of removing trees and groundcover in the course of preparing land for development. Land clearance is involved, for example, in road and driveway construction, utility excavation and building pad excavation.

Non-Woodland Area. Land in the urbanizing area composed of a parcel or a group of contiguous parcels less than 10 acres in total area and under one ownership or joint management.

Remove, Removal. Activities which include the cutting of trees and the injury and/or destruction of trees, by whatever method, on any lands subject to these provisions. Removal does not in any context include normal trimming or pruning of trees.

Person. Any individual, firm, partnership, association, corporation, company, organization, or legal entity of any kind, including governmental agencies conducting operations within the city and all tree removal companies and persons removing trees on behalf of others.

Slash. Any unutilized woody material created by tree removal, pruning, tree thinning, and/or land clearing.

Tree. Any woody perennial plant which, when mature, shall have the following characteristics: a main axis or stem commonly achieving 10 feet in height, and capable of being shaped and pruned to develop a branch-free trunk at least 9 feet in height or capable of being pruned in such a manner that the branching will grow parallel with the sidewalk or street.

Urbanizing Area. The area located between the legal city limits of the City of Eugene and the Urban Growth Boundary of the city as adopted by the Eugene-Springfield Metropolitan Area General Plan, as amended.

Woodland. Land in the urbanizing area composed of parcel or group of contiguous parcels covering 10 or more acres in total area, and under one ownership or joint management. (Revised by Ordinance No. 14-90D, Effective 11.21.90 [Sunset 11.30.91]; 16A-91, 11.20.91 [Sunset 6.1.93]; 4-93, 5.19.93 [Sunset 12.1.94]; 11-94, 11.22.94 [Sunset 12.1.95]; 3-96, 11.1.96)

(2) The condition of the trees proposed for removal, as measured by one or more of the following factors, warrants their removal:
   (a) Evidence of damage and/or disease.
   (b) Danger of falling.
   (c) General health and vigor.
   (d) Roots or crown interface with existing or proposed structures including necessary construction staging areas.

The City shall mark them "Approved" with the date of the action. The City shall also attach the conditions of approval to the plans.

(4) **Decision and Appeal.**
   (a) Unless the applicant agrees to a longer time period, within 10 working days of receipt of a complete and accurate application, the City Manager or designee shall approve, conditionally approve, or deny an application for a tree removal permit. The City Manager's decision shall be based on the criteria specified in LC 9.920 above.
   (b) If the permit includes conditions regarding restoration or replacement of trees, the time within which the restoration or replacement work is to occur shall be set forth on the permit.
   (c) Within 10 calendar days of a decision, it may be appealed by the applicant to the permitting agency. The appeal shall be filed with the City Manager on a form to be provided by the City, shall be accompanied by a fee of $100 and must state specifically how the city manager or his designee failed to properly evaluate the proposed tree removal or make a decision consistent with the applicable criteria.

(5) **Appeal Notice and Action.**
   (a) Appeals from the decision of the City Manager shall be heard by the City hearings official.
   (b) The hearings official shall hold a hearing within 20 calendar days of the receipt of an application to appeal the City Manager's decision.

   (d) Within 10 calendar days after the hearing, the hearings official shall render a decision and mail a copy to the applicant.
9.930 Permit Requirements.

1. General Tree Removal Permit Requirements.
   a. A Tree Removal Permit Application and related information shall be submitted by the applicant on forms required by the County. Failure of the applicant to submit a complete application may be cause for denial of the permit request. If not the property owner, the applicant shall provide a signed form by the property owner consenting to the permit request.
   b. The application shall be accompanied by a fee of $70.
   c. In all cases, the burden of demonstrating that applicable criteria and standards have been or can be satisfied is upon the applicant.
   d. Permit approval shall be valid for a period of 12 months from the date of final approval, unless otherwise provided for by the City Manager or designee.
   e. Conditions of approval may be made a part of the approval action by the City Manager or designee.

9.935 Tree Removal Standards.

All tree removal activities shall comply with the following standards, and with the General Guidelines as stated in Exhibit "A." Woodland tree removal activities only shall also comply with Woodland Forest Management Guidelines contained in Exhibit "B."

1. General Tree Removal Standards.
   a. Wooded areas within 25 feet of the high-water mark of riparian zones, natural drainageways, wetlands, and other water features shall remain undisturbed.
   b. Unless otherwise provided for by an approved site development plan, wooded areas within 100 feet of ridgelines and hilltops shall be protected consistent with the purposes of this ordinance. Hazard trees within ridgeline and hilltop areas shall be removed as they are identified.
   c. All remaining trunks and branches shall be disposed of in a manner approved of by the appropriate fire protection authority.
   d. Burning of slash materials shall be allowed in the area lying between the city limits and the Urban Growth Boundary subject to approval by those regulatory agencies currently governing such burning (Lane Regional Air Pollution Authority, Oregon Department of Forestry, and local rural fire protection districts), and based on an assessment of criteria including but not limited to:
      i. Air quality.
      ii. Proximity of the proposed burn to developed areas.
   e. During tree removal operations, adequate fire suppression equipment, as required by the applicable fire protection authority, shall be maintained on the site. Specific fire protection may be required by the fire protection authority as a condition of approval.
(2) Urbanizing Area (Non-Woodland) Permit Standards. Permit approval shall require compliance with the General Tree Removal Standards in LC 9.935(1) above and the following specific standards:

(a) For undeveloped parcels or for developed lots which have further potential for being partitioned or subdivided, land clearing shall be limited to designed street rights-of-way, utility areas, and areas necessary to the construction of proposed buildings and structures and associated scenic views as provided by LC 9.920(2)(h) above, as depicted on an approved development plan.

(b) All areas disturbed by the tree removal operation shall be restored to their original condition to the extent practicable and consistent with the purposes of LC 9.900 through 9.940. Restoration may require grading, grass seeding or replanting trees and must be completed in accordance with an approved schedule.

(c) Where appropriate, a diversity of tree species shall be encouraged on the site.

(d) Removal operations involving the use of any mechanized or motorized equipment shall be considered equivalent to construction site sounds and shall occur pursuant to Eugene Code Section 9.644(e)(6).

(3) Urbanizing Area (Woodland) Permit Standards. Permit approval shall require compliance with the General Tree Removal Standards in LC 9.935(1) above and the following specific standards:

(a) For woodland areas intended for conversion to urban uses, land clearing shall be limited to designated street right-of-way, utility areas, and areas necessary to the construction of proposed buildings and structures and associated scenic views as provided by LC 9.920(2)(h) above, as depicted on an approved development plan.

(b) For woodland areas intended for continued use as commercial forest land, maintenance of a basal area which provides sufficient canopy cover, reproductive capacity, understudy structure and wildlife habitat, in accordance with the provisions of Exhibit "B," shall be maintained within the woodland after harvesting.

(c) Temporary culverts necessary to bridge drainageways shall be removed and the drainageway restored to a reasonably natural condition following the completion of tree removal.

(d) All areas disturbed as a result of tree removal will be restored to their original condition to the extent practicable and consistent with the purposes of LC 9.900 through 9.940. Restoration may require grading, grass seeding or replanting trees and must be completed in accordance with an approved schedule.

(e) Where appropriate, a diversity of tree species shall be encouraged on the site.

(f) Tree removal operations occurring within 1000 feet of any dwelling shall be considered the equivalent of construction site sounds and shall occur pursuant to Eugene Code Section 9.644(e)(6).

9.940 Enforcement.

(1) Any person who removes or destroys any trees without having complied with this ordinance shall be subject to a civil penalty in an amount equal to 1.5 times the value of those trees, as computed from the International Society of Arboriculture tree value formula, or a similar method in common use, as determined by the City Manager or designee.

(2) Willful failure to comply with any provision of this code may be grounds for revocation or denial of any building, occupancy, or other permit issued to or applied for by the violator for the subject property, such grounds for revocation or denial not to extend beyond one year from the date of the failure to comply.

(3) In addition to any other remedy or penalty available for enforcing the provisions of this code, the City Manager may institute appropriate administrative or judicial action to enjoin a failure to comply with any provision of this code.

(4) Any person aggrieved by a penalty imposed or decision rendered under LC 9.940(1), (2) and (3) above may appeal the same within the time and manner as set forth in LC 9.925(4)(c) and
GENERAL TREE REMOVAL GUIDELINES

(1) The proposed tree removal activity should include provisions for the conservation and protection of trees which are to remain, in accordance with the following:
   (a) Prior to any development, or alteration of grade on a site for which a tree removal permit is required, trees which are not identified for removal should be protected from damage which could result from tree removal or construction activity. This standard shall not apply to commercial thinning or logging activities.
   (b) On parcels for which an Urbanizing (Woodland) Tree Removal Permit is required, ribbon enclosures shall be utilized to mark groups of trees within critical root zones, drainage corridors, property line buffers, ridgeline or hilltop leave areas, or other large areas into which tree removal activities or heavy equipment will not encroach.
   (c) All land disturbing activity, storage of equipment, building materials, fill soil, and all other materials should be kept within the development area and outside of the protective enclosure.
   (2) Shallow-rooted trees which are to remain should be retained in sufficiently large areas and dense stands, and their critical root zone areas protected in such a manner as to protect against windthrow.
   (3) Unless waived by written consent of the adjacent property owner(s), the edges of wooded areas along property lines should be maintained as buffers, except where prior development as occurred or future development is approved, including necessary ingress and egress points. Based on the environmental characteristics of the property as measured by the site evaluation factors in LC 9.920(3)(a)-(i), these buffers should be 20 feet or more in depth from the property line measuring into the subject property. Within these buffers, existing trees as defined in LC 9.905 should be maintained, except for hazard trees which may be removed as they are identified.

WOODLAND FOREST MANAGEMENT GUIDELINES

A. Purpose. These guidelines are intended to maintain and encourage the growing of trees for future production and to provide for landowners to realize a return on investments in the property and resource. These standards are considered acceptable, provided the landowner uses good judgment; they may be altered provided sound and objective information is supplied to the city manager or designee clearly leading to the conclusion that alternative approaches or outputs are more appropriate.

B. Guidelines.
1. Retain all healthy deciduous trees.
2. Retain all healthy Ponderosa pine trees.
3. Retain all healthy conifers of 36" or greater DBH.
4. Remove all hazard trees.
5. In no case shall the naturally occurring density of tree areas be reduced below 80 square feet per acre or below 50 percent crown closure, unless the naturally occurring stand is determined to have 100 percent crown closure, in which case reduction to less than 80 square feet per acre may be considered on a case by case basis. Trees shall be well dispersed over the site.
6. Table I (Minimum Stocking) and II (Crown spacing) shall be used to achieve compliance with these guidelines.
7. Final harvesting or clear-cutting shall not exceed five percent of the acreage of any single ownership within the Urbanizing Area in any one year. For purposes of this calculation, ownerships through which the Urban Growth Boundary passes shall not include lands outside the UGB.

8. Buffers and thinning shall be used to protect offsite views of the property.

9. In circumstances of natural calamity or disaster (e.g., windstorm causing blow-down), the above guidelines may be waived or exceeded in order to provide for salvage operations.
