

Wildfire Damage Housing Relief Program

Recovering from an unexpected emergency is hard, particularly a lost or damaged home. The Oregon Legislature created the Wildfire Damage Housing Relief program to fill the gaps that FEMA and private insurance can't cover for very low income Oregonians. The home that was lost or damaged must be the primary residence.

When can someone apply for assistance?

Oregon Housing and Community Services (OHCS) opened a [waitlist](#) for this program. A Major Disaster Declaration was approved for many of the 2020 wildfires; Oregonians affected by the wildfires in the eight designated counties have access to FEMA Individual Assistance. Impacted households should apply for FEMA first at [DisasterAssistance.gov](#).

When are assistance grants made?

Due to federal duplication of benefits and sequence of delivery requirements, OHCS assistance must come **after** FEMA assistance and insurance payments. OHCS is working closely with FEMA to ensure the state meets federal requirements.

How much are assistance grants?

Wildfire Damage Housing Relief grants can fill gaps from FEMA and private insurance up to \$7,000. However, program funds are very limited and grants will likely be less than \$7,000.

What are the income requirements?

Eligible Oregonians must earn less than [200% of Federal Poverty Level](#) as required by Oregon Revised Statute 458.667. See the chart on the next page for the 2020 income limits.

Visit [Wildfire.Oregon.gov](#) to find more assistance.
