

# **ICE AND SNOW REMOVAL PLAN**

**LANE COUNTY  
PUBLIC WORKS**

**ROAD MAINTENANCE  
OPERATIONS POLICY**

**March 2015**

**LANE COUNTY PUBLIC WORKS  
ICE AND SNOW REMOVAL PLAN – ROAD MAINTENANCE OPERATIONS POLICY**

**POLICY NEED**

The Lane County Public Works Department has established an ice and snow removal operations policy in order to efficiently use its resources and effectively respond to snow and ice conditions that cause unsafe driving conditions.

**PURPOSE STATEMENT**

To provide a uniform policy, procedure, and level of service for snow removal and ice control operations on the Lane County road system.

**GOALS**

1. To provide access for emergency vehicles to as much of the County as possible.
2. To prioritize and define the appropriate level of service to be provided by the County Road Maintenance Department in response to snow and ice accumulations on County roads.
3. To mitigate unsafe road surface conditions to the greatest extent possible with available resources.
4. Identify service level priorities by location and function of County roads.

**PROCEDURE**

The Public Works Director or designee has primary responsibility to take all reasonable and prudent steps to satisfy this policy consistent with resources available and accessibility by County equipment.

**SERVICE PRIORITIES**

Roads will be cleared and maintained based on service level priority. The following factors were taken into consideration in establishing service priorities.

1. Road Functional Class.
2. Traffic Volumes.
3. Availability of alternate routes.
4. Steep grades, sharp curves, intersections, or potentially hazardous areas.
5. Roads with adequate room to turn County equipment around.
6. Emergency vehicle accessibility.

Snow plowing and sanding activities will be accomplished by service level priority. Road service priorities are designated as level one (1) through level four (4) with level one as the highest priority. Service levels are further defined in ice and snow removal priority.

The snow removal and ice control priority list and map identify priority levels. The list and map will be reviewed every three (3) years and updated as needed. The Public Works Director or designee may make discretionary changes to the service priority of any road when in his/her judgment conditions require such actions.

## **COMMUNICATIONS**

Communications within the Department and between the Department and other agencies are important in providing information to execute this plan.

Notice of adverse road conditions may be received by the Department from observations of department employees, telephone calls from private citizens to the Public Works Department or Sheriff's Department, or notification from the 911-dispatch center. Response to these notices shall be in accordance with the plan.

Anyone may call to report problems or concerns to the Public Works Department during business hours (Monday through Friday, 9 a.m. to 4 p.m.) at 541-682-6900, or by contacting the Sheriff's non-emergency number after hours, weekends, and holidays at 541-682-4150.

## **CALL OUT CRITERIA**

The Emergency On-Call Personnel list is updated by Public Works staff once a month. . The Sheriff's Department dispatch will call the Emergency On-Call Road Maintenance Supervisor/designee to inspect a road to determine whether snow and ice control operations are needed.

## **SNOW PLOWING**

The snow removal plan will be activated when the snow accumulation reaches three (3) inches on County roads and it is continuing to snow.

## **SANDING APPLICATION PRIORITY**

In the event of a countywide condition of ice build-up, the priority for sanding application will be the same as it is for snow removal.

In accordance with this plan, traction materials and anti-icing materials will be applied only to intersections where vehicle stops are required, and to steep grades, curves and bridges. If the Department receives actual notice of an area that would benefit from the application of traction materials, the Maintenance Supervisor shall evaluate the need in accordance with the priorities of this plan. Sanding material will not be applied to straight level roads. During snow events, sanding materials will be applied only after plowing operations have ended.

## **ANTI-ICING APPLICATION PRIORITY**

Roadway anti-icing is the application of chemicals that retard the formation of ice or the development of bond between snow and the roadway surface. This is achieved by the application of a chemical freezing-point depressant. The technology uses various solutions of calcium magnesium acetate applied to the roadway prior to moisture reaching the freezing point. In light or moderate snowstorms the freezing point can be depressed to as low as minus 10 degrees Fahrenheit.

## **CLEAN-UP**

Residual sweeping/flushing of sand from roads and on-street bicycle lanes will be a priority and will be performed as soon as reasonably possible after the event. This will be accomplished using the same service priority level established by the snow and ice plan.

## **BIKEPATHS**

The County will not plow or sand bike paths that are separate from the roadway. The County will attempt to plow and sand on-street bicycle lanes.

## **LOCAL ACCESS ROADS**

Local Access Roads are public roads that are not maintained by the County. Snow and ice control operations will not be performed on local access roads.

## **SNOW REMOVAL POLICY ON MAILBOXES, DRIVEWAYS AND SIDEWALKS**

In the process of snow removal, mailboxes may be damaged or access to mailboxes obstructed, driveways may be closed and sidewalks may be covered. It is the responsibility of the abutting landowner to remove such snow.

Only mailboxes physically hit by County equipment will be reinstalled. Mailboxes knocked down by flying snow will not be reinstalled.

It is the responsibility of the property owner to provide clear access up to the mailbox for the postal carrier.

The County is not responsible for opening driveways that have access onto County roads. This is the responsibility of the property owner. Property owners should not move snow onto the public roadway.

## **PROPERTY DAMAGE**

Public Works is not responsible for damage to privately owned landscaping or structures, including but not limited to fences, signs, curbs, and wires that are installed within the public right-of-way.

## **DAMAGE PRECAUTIONS**

Signs and posts – Caution will be taken to avoid damage to signs, mailboxes, posts, and delineators during snow removal.

Buildings – Snowplow operators will reduce speed where adjacent buildings or facilities might be damaged by the flying snow.

Parked and/or Unattended Vehicles – Care will be exercised in removing snow in the vicinity of vehicles parked adjacent to County roads. Even though vehicles are illegally parked on the travel way, reasonable care will be taken consistent with the necessity of completing the required work.

Vehicles parked and unattended in the right-of-way are left at the owner's risk. Any damage to vehicle is the owner's responsibility and will not be paid by the County ( i.e., paint damage by sanding operations will not be repaired or paid).

## **SNOW REMOVAL PRIORITY**

Snow plowing activities will be accomplished by priority in so far as practicable, as described by the following levels. For all levels, efforts may be discontinued when blizzard or other severe forms of weather make operation of maintenance equipment and motor vehicles unreasonable and unsafe.

### **PRIORITY 1**

**Road Type:** Roads that fall under this level are generally major transportation routes such as arterial and major collector roads that carry moderate to high volumes of traffic.

A few roads at this level may be placed at a level 2 priority when an alternative route is available, the road has a low residential density, and storm intensity requires greater effort on the more significant transportation routes.

**Control Efforts:** Maintain two lanes of traffic during the storm. Remove snow through the duration of storms to keep roads open to traffic and provide a reasonable surface on which to operate with approved traction devices.

When effective, apply abrasives to enhance traffic safety on steep grades, sharp curves, bridge approaches, decks, and intersections.

### **PRIORITY 2**

**Road Type:** Roads that fall under this level are generally major collector routes carrying moderate volumes of traffic. Some steep roads serving residential areas, which require early plowing for public safety access, may be included in this level.

Some roads exhibiting these characteristics may be placed at a level 3 priority when an alternative route is available and/or the road has a low residential density.

**Control Efforts:** When personnel and equipment are available, remove snow during the storm to keep the roads open for two lanes of traffic.

### **PRIORITY 3**

**Road Type:** Roads that fall under this level are minor collector routes, urban residential roads, and rural local roads that typically carry moderate to low volumes of traffic.

**Control Efforts:** Snow removal shall be accomplished during regularly scheduled work hours when personnel and equipment are available.

## **PRIORITY 4**

**Road Type:** Roads that fall under this level are gravel roads that carry low volumes of traffic or roads without residents such as park roads.

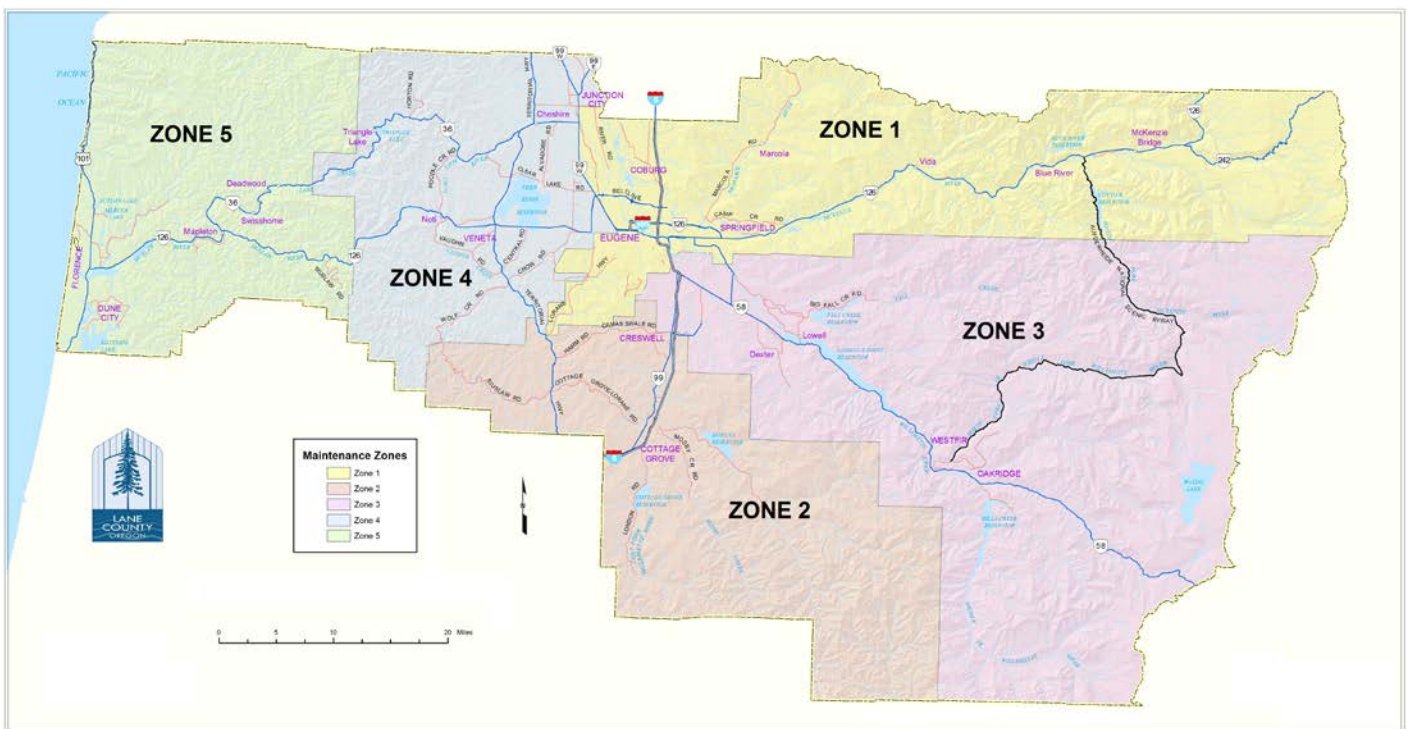

**Control Effort:** Snow removal shall be accomplished during regularly scheduled work hours when personnel and equipment are available.

## **MAINTENANCE ZONE DESCRIPTIONS**

The map and Maintenance Zone boundaries described below shall be used in conjunction with the list that follows.

The list provided includes only the roads within the operational maintenance of Lane County and does not include roads that are maintained by other agencies such as a City or State.

- A. Maintenance Zone 1 – Eugene/Springfield metro areas, Coburg, McKenzie & Marcola
- B. Maintenance Zone 2 – Cottage Grove, Creswell, Saginaw & Lorane
- C. Maintenance Zone 3 – Dexter, Pleasant Hill, Lowell, Westfir & Oakridge
- D. Maintenance Zone 4 – Veneta, Junction City, Noti, Cheshire & Triangle Lake
- E. Maintenance Zone 5 – Florence, Mapleton, Swisshome & Deadwood
