### Benefits of Home Visiting Programs

- Evidence based and evidence informed
- Associated with positive outcomes for children and families
- Better compliance with medical provider’s instructions
- Care coordination/care management
- Ongoing health and psychosocial assessments
- Anticipatory guidance and preventative services based on need
- Early identification of problems and swift intervention
- Reductions in risk factors that lead to chronic conditions
- Improvements in HEDIS and other quality metrics
- Meet with clients in their home or in the community, including rural areas
- Interpreters available in person and over the phone
- Therapeutic nurse-client relationships
- Comprehensive in design to address multiple needs in one visit
- Continuity, one nurse for one family

### Babies First!

(Priority given to birth to 3 years of age or a new diagnosis)

- **A1.** Drug exposed infant (See A29)
- **A2.** Infant HIV positive
- **A3.** Maternal PKU or HIV positive
- **A4.** Intracranial hemorrhage (excludes Very High Risk Factor B16)
- **A5.** Seizures (excludes VHR Factor B18) or maternal history of seizures
- **A6.** Perinatal asphyxia
- **A7.** Small for gestational age
- **A8.** Very low birth weight (1500 grams or less)
- **A9.** Mechanical ventilation for 72 hours or more prior to discharge
- **A10.** Neonatal hyperbilirubinemia
- **A11.** Congenital infection (TORCH)
- **A12.** Central nervous system infection (e.g., meningitis)
- **A13.** Head trauma or near drowning: monitoring change
- **A14.** Failure to grow
- **A16.** Suspect vision impairment: monitoring change
- **A18.** Family history of childhood onset hearing loss
- **A24.** Prematurity
- **A25.** Lead exposure
- **A26.** Suspect hearing impairment: newborn hearing screen REFER
- **A29.** Alcohol exposed infant

### CaCoon

(Priority given to birth to 3 years of age or a new diagnosis)

- **Diagnoses**
  - **B1.** Heart disease
  - **B2.** Chronic orthopedic disorders
  - **B3.** Neuromotor disorders including cerebral palsy & brachial nerve palsy
  - **B4.** Cleft lip and palate & other congenital defects of the head and face
  - **B5.** Genetic disorders (i.e., cystic fibrosis)
  - **B6.** Multiple minor physical anomalies
  - **B7.** Metabolic disorders
  - **B8.** Spina bifida
  - **B9.** Hydrocephalus or persistent ventriculomegaly
  - **B10.** Microcephaly & other congenital or acquired defects of the CNS including craniosynostosis
  - **B12.** Organic speech disorders (dysarthria/dyspraxia)
  - **B13.** Hearing loss
  - **B23.** Traumatic brain injury
  - **B24.** Fetal Alcohol Spectrum Disorder
  - **B25.** Autism, Autism Spectrum Disorder
  - **B26.** Behavioral or mental health disorder with developmental delay
  - **B28.** Chromosome disorders (e.g., Down syndrome)
  - **B29.** Positive newborn blood screen
  - **B30.** HIV, seropositive conversion
  - **B31.** Visual impairment

- **Very High Risk Medical Factors**
  - **B16.** Intraventricular hemorrhage (grade III, IV) or cystic periventricular leukomalacia (PVL) or chronic subduralhematomas
  - **B17.** Perinatal asphyxia accompanied by seizures
  - **B18.** Seizure disorder
  - **B19.** Oral-motor dysfunction requiring specialized feeding program (gastrostomies and/or failure to grow, both organic and non-organic)
  - **B20.** Chronic lung disease (e.g., on oxygen, infants with tracheostomies)
  - **B21.** Suspect neuromuscular disorder including abnormal neuromotor exam at NICU discharge

- **Developmental Risk Factors**
  - **B22.** Developmental delay

- **Other**
  - **B90.** Other chronic conditions not listed
